## FURNITURE DESIGNED TO SATISFY THE NEEDS WITHIN SECURE LIVING ENVIRONMENTS

In an ever changing world the demands on furniture are increasing. With our past history and experience of working in partnership with Secure Hospitals, Prisons and other secure Local Authority establishments, Godfrey Syrett have produced and designed a range of furniture with added strength and safety features, whilst keeping a warm homely aesthetic feel. Yet still offer you peace of mind that staff or patients safety is not compromised.

You also have the added confidence you have come to expect from Godfrey Syrett Limited, the high standards of manufacturing and value for money of all our products and exceptional Customer Service.

Every client group has different requirements. We are happy to sit and consult with you and your staff so that we can clearly understand your needs and provide you with a tailored solution to fit your exact needs. If we cannot offer a product from our extensive range we will endeavour to produce a tailored solution to meet your specification.

**HISEC-RT50-126S**

Fully Welded Lugs

Welded Endcaps

**HISEC-FPD-126S**

All desking and tables products within the range utilise a continuous welded leg frame with no bolt connections.

Secure Foot Plates

Page 2 & 3

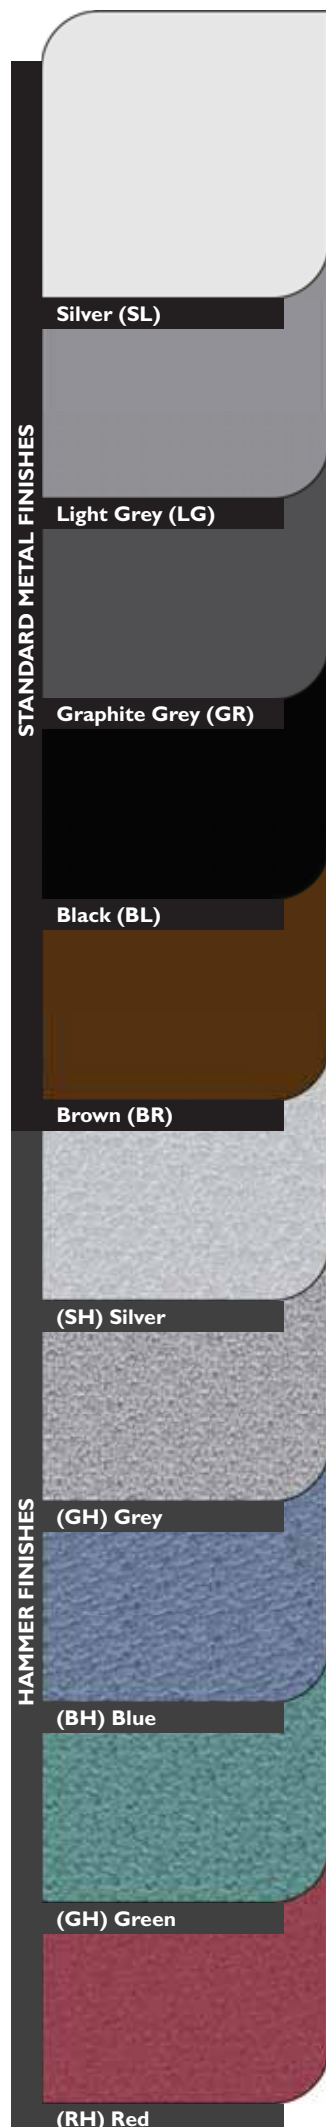

Page 4 & 5

Page 6 & 7

We understand that to create a 'friendly' environment conducive to your client's well-being and treatment, softer, more 'domestic' looking furniture is required. Throughout the development of this range we have asked ourselves the following questions to help provide these types of products :-

- Is the construction robust enough to withstand a patient pulling it apart with ease?
- Are there any metal components that would pose a risk?
- If it were broken, would the subsequent parts become weapons?
- Would the design make it easy to conceal objects from staff?
- Are the legs firmly attached? Look for chairs where the legs are part of the structure, not just screwed to the frame.

### HIGH SECURITY PRODUCT FEATURES:

- All furniture has non-retractable (tamper-proof) screws.
- Springs/webbing are concealed with a plywood plate.
- Zips have 'tongues' removed and sewn over to prevent opening.
- Tables have a continuous leg frame.
- Laminate surfaces are 'continuous'.
- No hanging rails in cupboards or wardrobes – use lipped hanging shelves when needed.
- Drawers have wooden runners, secured for non removal.
- No metal studs, castors or 'glides' on the feet of furniture.
- Piano hinges used.

**HISEC-WT750**  
Secure Coffee Table

NOTE: Some of our MFC products are not available as Veneer products. Veneers are designated with aV\* in the ordering system. Whilst we ensure that the colours and finishes shown on this page are as accurate as the printing process will allow, we recommend that you check colour samples first.

# Studio Tri-Sec

# Past Experience

We have Looked at the design of the furniture first with the above security checks in mind. We offer a wide range of finishes, and Soft furnishing have an easy-clean fabric, preferably waterproof, but not necessarily vinyl.

Above all, is the furniture comfortable for the user?

There is little point in doing all the security modifications if it is not used by the persons it is intended for.

## HISEC-SDC

The bedside cupboards are constructed using piano hinges to provide the maximum amount of strength possible for the price range.

## HISEC-SBB

The bed frame, along with all high security furniture, is constructed with tamper proof screws that are non-retractable.

Within the high security furniture market we have a wealth of experience dealing with specific requirements and tailoring our standard ranges to suit the needs of our clients. We have installed furniture in Rampton Secure Hospital as well as the Broadmoor Mental Hospital.

Nottinghamshire Healthcare  
Rampton Hospital 

West London Mental Health  
Broadmoor Hospital 

The furniture requirements for these establishments were highly specialised. Our team of designers worked in conjunction with the management committee and developed products specific for their requirements. Our planning team then took over and space planned the entire site so as maximising efficiency and providing a cost effective solution within a streamlined and professional service.
