

# Redefine Your Boundaries

*with the latest furniture collection from Godfrey Syrett*

GODFREY SYRETT

*Design Make Deliver*

**Hello we're  
Godfrey Syrett**

**We're a designer and manufacturer of furniture solutions for a wide range of companies, servicing sectors across the UK from our base in the North East of England.**

We specialise in creating inspirational workspaces with furniture that meets the needs of its users; from collaborative and easily-adjustable layouts, to areas for individual focused work, and traditional office spaces. We pride ourselves on our full-service approach; managing the whole process from designing and manufacturing furniture, to delivering and installing on site.

We'd like to invite you to 'Redefine Your Boundaries' with Isla, our innovative seating range which, as well as creating a comfortable seating area, also creates an engaging design feature. We are also very excited to present Eze, a chair designed for collaborative and touchdown spaces, designed by Norbert Geelen and supplied to the UK market exclusively by Godfrey Syrett.

Our stand is a sanctuary of block colour, with each shade defining the space for an individual product range.

We're a friendly bunch, and we'd love to see you on our stand. Come along to feel the fabrics, test the furniture, and chat to our knowledgeable and passionate team!

With much furniture love,

**GODFREY SYRETT**

*Design Make Deliver*

# Introducing Isla

*no-one is an island*

**Isla is a flexible, adaptable seating range;  
designed for the modern workspace.**

Spaces today are continually less distinct, with little definition between work and rest areas. A single furniture layout may need to accommodate many different tasks, from focused individual work and collaborative sessions to relaxation and down time. As a result, users need spaces that can be easily adapted to suit the task in hand.

Isla has been developed in response to this changing landscape. A fluid system, it can be used as individual seating units; or as a combination of elements to create island chains. Due to the innovative accessory attachment system, reconfiguration can be easily achieved for an adaptive working environment.

Isla is an ideal solution for commercial spaces within growing companies, and for staff and student breakout areas in universities; with a choice of booths, tall seating or sofa setup, and a range of accessories including side and coffee tables.

# Molly

*harmonious design*

**Molly is a comprehensive family of fully upholstered, armless lounge chairs. A variety of frame options and fabrics can be used to create different looks, whilst maintaining a harmonious design thread through a scheme.**

The range sits well alongside our Jude coffee and dining tables; as well as conference and meeting room tables.

Thanks to the vast range of frames available - 8 in total - Molly will work perfectly in corporate and higher education environments.

# Mr Jones

*striking and sophisticated*

**Italian by design and an iF award winner, Mr Jones is a soft seating range that is as striking as it is sophisticated. Relaxed, contoured lines hint at Mr. Jones' supreme comfort, and its distinctive shape ensures that it'll make an impact in any environment.**

Mr Jones is available as a 1 or 2-seater sofa, or can be configured using a series of modular elements to create a feature installation.

The addition of a four-star wooden swivelling base enhances the Mr Jones range; suiting well with the rest of the family to enhance reception, breakout and office spaces.

# Eze

*simple and bold*

**Eze is an occasional task chair which is ideally suited to conference spaces, touchdown and breakout areas, or meeting rooms. Initially inspired by the tapered shape of a wine glass, the backframe embraces the chair in one simple, bold movement; defining its posture and creating a sophisticated and flowing surface.**

Eze is perfectly suited to collaborative applications, touchdown working environments, in visitor areas, or as a light work chair.

Designed by Norbert Geelen, Eze is supplied exclusively to the UK market by Godfrey Syrett.

# Harry & Ken

*visually light*

**Our Ken stools and Harry tables are named after the founders of our company, and were launched in commemoration of our 70th anniversary in 2017.**

They are designed to sit comfortably together, or complement larger, soft seating ranges like Isla. The skid base, combined with a minimal design aesthetic, allows them to suite in with other product ranges offering a similar leg style.

## Bob Muir

Bob graduated the Design for Industry course at Northumbria University in 2013, joining Godfrey Syrett as Product Designer shortly after.

Bob's interest lies in creating minimal, robust and sustainable products; with an emphasis on ease of maintenance and repair.

Bob is the creative mind behind Isla, our adaptable and innovative sofa system which will preview at Clerkenwell Design Week 2018.

## Shona Cushnahan

A recent addition to Godfrey Syrett's Product Design team; Shona joins us from a background in Product Development for a soft seating specialist. She graduated from Northumbria University in 2015 with a degree in 3D Design: Furniture and Product.

Shona's expertise is in bespoke manufacturing, and the technical aspects of taking a product from concept to reality.

Since joining Godfrey Syrett; Shona has worked alongside Bob to support him with the development of the Isla sofa system.

## Michael Kildare

Mike graduated from the South Glamorgan Institute of Higher Education in 1989, with an Honours degree in Industrial Design (Engineering). He joined Godfrey Syrett the following year.

Fast approaching his 30th anniversary with the company, Mike was instrumental in the introduction of Godfrey Syrett's first official desking range; and he has championed this product offer ever since.

With a technical approach to design, Mike has developed the Volume range to create a clean and minimalist approach to storage.

## Kevin Thompson

Kevin graduated from Newcastle Polytechnic (now Northumbria University) in 1977, and joined Godfrey Syrett that same year.

With a degree in 3D Design: Furniture; Kevin has worked on a variety of product ranges in his time with the company, and currently focuses on our seating offer.

Kevin was heavily involved in the introduction of Molly and Mr Jones to our product portfolio.

## Norbert Geelen

Norbert graduated with a degree in Industrial Design from the University of Essen in Germany. Following a successful partnership with Robert Kilders, he established Norbert Geelen Industrial Design in 2005.

Norbert is the designer behind the Eze chair, an occasional task chair with sophisticated presence, which is officially launching to the UK market at Clerkenwell Design Week 2018.

## Orlandini Design

Orlandini Design was established in 2009 by Paolo Orlandini. With many years' experience in the industry, Paolo brought together a team of young creatives and designers to form a new design studio - a perfect combination of past experience and new technology.

Orlandini Design pride themselves on creating furniture that is both innovative and economical. Their Mr Jones seating range, with a wooden swivel base, won an iF Design award in 2016.
